

Idaho 44 Corridor Preservation Study

Study Description

The Idaho Transportation Department (ITD) and Community Planning Association of Southwest Idaho (COMPASS) are identifying future transportation needs along the Idaho 44 corridor from Ballantyne Lane in Ada County to I-84 in Canyon County.

When complete, the Idaho 44 Corridor Preservation Study will include:

- A list of improvements within this corridor.
- How much right-of-way is necessary to improve the corridor.
- An approved environmental document.
- An access management plan that will identify the number and locations of driveways and intersections on Idaho 44.
