

Idaho 44 Corridor Preservation Study

Screening Process

ITD is evaluating each of the route options (north, south and existing) for five segments of Idaho 44. This **screening process** involves answering several questions:

1. **Does it meet the Purpose and Need statement for the project?**
2. **Is the route consistent with regional, city and county plans?**
3. **If this route is selected, how much right-of-way may be needed to construct it?**
4. **What impacts would this route have on:**
 - Homes and businesses?
 - Cultural sites?
 - Wetlands?
 - Hazardous material sites?
 - Parks and recreation areas?
5. **What did the public say about this option?**

ITD will eliminate some route options during the screening process. The remaining options will be developed into alternatives for detailed analysis.
